RULES: (In addition to the General Rules)

- In selecting vegetables for exhibition, choose specimens that would bring the highest market price. Do not select the largest, select medium size specimens. Do not mix varieties.
- The following factors are generally used by an expert vegetable judge:
 - Trueness to variety type.
 - Uniformity in shape, size and color.
 - Pick to perfect specimen and then select others as similar to it as possible. Never mix specimens of different maturity.
 - Protect from dirt, disease, infection and mechanical damage. Select specimens that are perfect and show no blemishes of any kind.
 - Condition of maturity – be sure that specimens are of high quality.
 - Potatoes should not be washed. Remove soil with a soft cloth or brush.
 - Tomatoes should have the stems removed unless otherwise stated. Carrots, beets, etc. should have tops (leaves) removed from vegetables leaving about two (2) inches of stems.
- Read instructions carefully. If an entry calls for five (5) specimens, be sure to enter the correct number, not four (4) or six (6). Your entry will be disqualified if the correct numbers of specimens are not entered.
- Each exhibitor is responsible for entering his/her vegetables in the proper class. Items not entered correctly will be disqualified.
- Exhibit your vegetables on white Styrofoam or heavy paper plates except where specifically told otherwise.
- **Exhibitors must bring their own plates.**
- All vegetables/herbs will be shown in Open Division only.
